

ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE

and

ILLINOIS DIVISION OF FORESTRY

NOVEMBER 1979-FEBRUARY 1980

April 9, 1980

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1979 THROUGH FEBRUARY 1980

Winter sawtimber prices paid Illinois timber growers were higher than prices paid a year earlier. Of the timber buyers reporting volume of their 1979 operations, 54% indicated their volume was under 500 thousand board feet. This was down from 59% reported a year earlier on their 1978 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forestry. The cooperation of the licensed timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Conservation, 600 N. Grand Ave., West, Springfield, Illinois 62706.

ILLINOIS TIMBER PRICES SURVEY

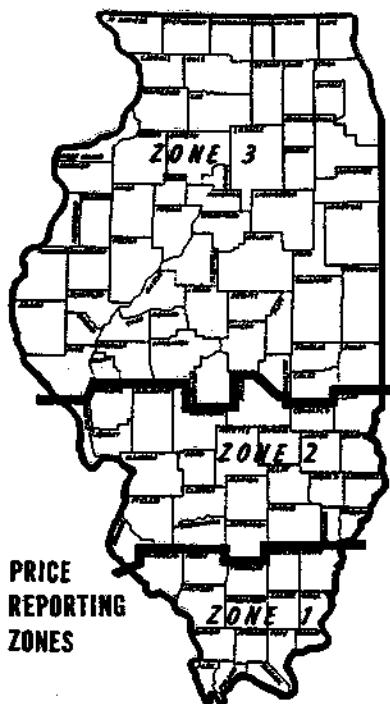

ILLINOIS COOPERATIVE CROP REPORTING SERVICE

and

ILLINOIS DIVISION OF FORESTRY

MAY-AUGUST 1980

October 21, 1980

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1980 THROUGH AUGUST 1980

Summer sawtimber prices paid Illinois timber growers were generally lower than prices paid a year earlier. Of the timber buyers reporting volume of their 1980 operations, 53% indicated their volume was under 500 thousand board feet. This was up slightly from 52% reported a year earlier on their 1979 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forestry. The cooperation of the licensed timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Conservation, 600 N. Grand Avenue, West, Springfield, IL 62706.

ILLINOIS TIMBER PRICES

ILLINOIS COOPERATIVE CROP REPORTING SERVICE
and
ILLINOIS DIVISION OF FORESTRY

MAY ~ AUGUST 1981

December 10, 1981

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1981 THROUGH AUGUST 1981

Summer sawtimber prices paid Illinois timber growers were mixed as compared to a year earlier. Of the timber buyers reporting volume of their 1981 operations, 50% indicated their volume was under 500 thousand board feet. This was down from 53% reported a year earlier on their 1980 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forestry. The cooperation of the licensed timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Conservation, 600 N. Grand Ave., West, Springfield, Illinois 62706.

ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE

AND

THE ILLINOIS DIVISION OF FOREST RESOURCES AND NATURAL HERITAGE

MAY - AUGUST 1982

December 14, 1982

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1982 THROUGH AUGUST 1982

Summer sawtimber prices paid Illinois timber growers were generally mixed as compared to a year earlier for stumpage but mostly lower for F.O.B. Of the timber buyers reporting volume of their 1982 operations, 67% indicated their volume was under 500 thousand board feet. This was up from 50% reported a year earlier on their 1981 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forest Resources and Natural Heritage. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources and Natural Heritage, Illinois Department of Conservation, 600 N. Grand Avenue, West, Springfield, Illinois 62706.

ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE

AND

THE ILLINOIS DIVISION OF FOREST RESOURCES AND NATURAL HERITAGE

MAY - AUGUST 1983

December 20, 1983

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1983 THROUGH AUGUST 1983

Summer sawtimber prices paid Illinois timber growers were generally mixed as compared to a year earlier for stumpage but mostly higher for F.O.B. Of the timber buyers reporting volume of their 1983 operations, 62% indicated their volume was under 500 thousand board feet. This was down from 67% reported a year earlier on their 1982 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forest Resources and Natural Heritage. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources and Natural Heritage, Illinois Department of Conservation, 680 No. Grand Avenue, West, Springfield, Illinois 62706.

ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE
AND
THE ILLINOIS DIVISION OF FOREST RESOURCES AND NATURAL HERITAGE

MAY - AUGUST 1984

December 4, 1984

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1984 THROUGH AUGUST 1984

Summer sawtimber prices paid Illinois timber growers were generally higher than a year earlier for both stumpage and F.O.B. Of the timber buyers reporting volume of their 1984 operations, 58% indicated their volume was under 500 thousand board feet. This was down from 62% reported a year earlier on their 1983 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forest Resources and Natural Heritage. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources and Natural Heritage, Illinois Department of Conservation, 600 No. Grand Avenue, West, Springfield, Illinois 62706.

ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE
AND
THE ILLINOIS DIVISION OF FOREST RESOURCES AND NATURAL HERITAGE

NOVEMBER 1983-FEBRUARY 1984

June 20, 1984

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1983 THROUGH FEBRUARY 1984

Winter sawtimber prices paid Illinois timber growers were generally higher than a year earlier for both stumpage and F.O.B. Of the timber buyers reporting volume of their 1983 operations, 59% indicated their volume was under 500 thousand board feet. This was down from 63% reported a year earlier on their 1982 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forest Resources and Natural Heritage. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources and Natural Heritage, Illinois Department of Conservation, 600 No. Grand Avenue, West, Springfield, Illinois 62706.
