

ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE
AND
THE ILLINOIS DIVISION OF FOREST RESOURCES AND NATURAL HERITAGE

NOVEMBER 1984-FEBRUARY 1985

June 20, 1985

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1984 THROUGH FEBRUARY 1985

Winter sawtimber prices paid Illinois timber growers for stumpage and F.O.B. mill were generally mixed as compared to a year earlier. Of the timber buyers reporting volume of their 1984 operations, 45% indicated their volume was 500 thousand board feet or higher. This was up from 41% reported a year earlier on their 1983 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forest Resources and Natural Heritage. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources and Natural Heritage, Illinois Department of Conservation, 600 No. Grand Avenue, West, Springfield, Illinois 62706.

ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE

AND

THE ILLINOIS DIVISION OF FOREST RESOURCES AND NATURAL HERITAGE

MAY - AUGUST 1985

November 27, 1985

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1985 THROUGH AUGUST 1985

Summer sawtimber prices paid Illinois timber growers were generally lower than a year earlier for stumpage but mixed for F.O.B. Of the timber buyers reporting volume of their 1985 operations, 37% indicated their volume was 500 thousand board feet or higher. This was down from 42% reported a year earlier on their 1984 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forest Resources and Natural Heritage. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. ILLINOIS TIMBER PRICES SURVEY

ILLINOIS COOPERATIVE CROP REPORTING SERVICE

AND

THE ILLINOIS DIVISION OF FOREST RESOURCES AND NATURAL HERITAGE

NOVEMBER 1985-FEBRUARY 1986

June 3, 1986

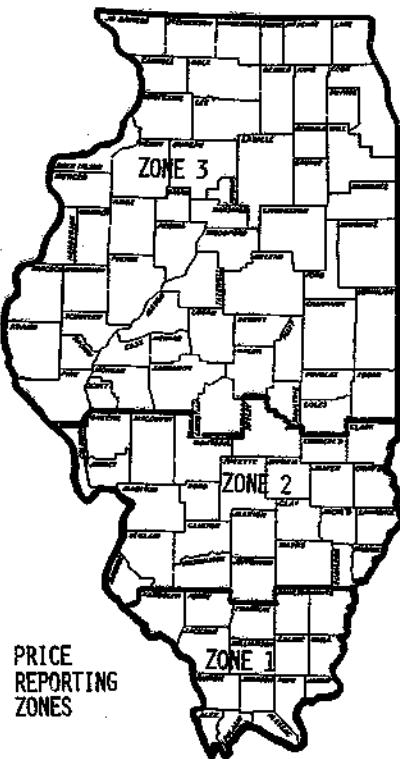

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1985 THROUGH FEBRUARY 1986

Winter sawtimber prices paid Illinois timber growers for stumpage and F.O.B. mill were mostly higher than a year earlier. Of the timber buyers reporting volume of their 1985 operations, 42% indicated their volume was 500 thousand board feet or higher. This was down from 45% reported a year earlier on their 1984 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Cooperative Crop Reporting Service with the assistance of the Illinois Division of Forest Resources and Natural Heritage. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources and Natural Heritage, Illinois Department of Conservation, 600 No. Grand Avenue, West, Springfield, Illinois 62706.

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1987 THROUGH FEBRUARY 1988

Winter sawtimber prices paid Illinois timber growers for stumpage and F.O.B. mill were mostly higher than a year earlier. Of the timber buyers reporting volume of their 1987 operations, 48% indicated their volume was 500 thousand board feet or higher. This was down from 37% reported a year earlier on their 1986 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Agricultural Statistics Service with the assistance of the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1988 THROUGH AUGUST 1988

Summer sawtimber prices paid Illinois timber growers were generally higher than a year earlier for both stumpage and F.O.B. Of the timber buyers reporting volume of their 1988 operations, 43% indicated their volume was 500 thousand board feet or higher. This was 13 percentage points more than a year earlier on their 1987 operations.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1988 THROUGH FEBRUARY 1989

Winter sawtimber prices paid Illinois timber growers for stumpage and F.O.B. mill were mostly higher than a year earlier. Of the timber buyers reporting volume of their 1988 operations, 36% indicated their volume was 500 thousand board feet or more. This was down from 48% reported a year earlier on their 1987 operations.

This report is prepared by the Illinois Agricultural Statistics Service with the assistance of the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1989 THROUGH AUGUST 1989

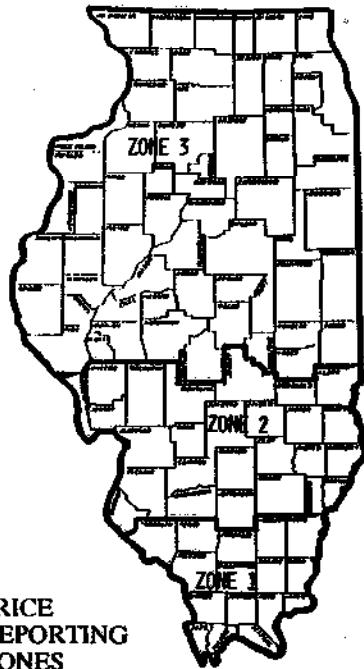

Summer sawtimber prices paid Illinois timber growers were generally higher than a year earlier for both stumpage and FOB. Of the timber buyers reporting volume of their 1989 operations, 43% indicated their volume was 500 thousand board feet or higher. This was unchanged from the 1988 percentage.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.
