May 25, 1990  
PRICES PAID ILLINOIS TIMBER PRODUCERS  
NOVEMBER 1989 THROUGH FEBRUARY 1990

Winter sawtimber prices paid Illinois timber growers for stumpage and F.O.B. mill were mostly higher than a year earlier. Of the timber buyers reporting volume of their 1989 operations, 41% indicated their volume was 500 thousand board feet or more. This was up from 36% reported a year earlier on their 1988 operations.

This report is prepared by the Illinois Agricultural Statistics Service with the assistance of the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

### PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1990 THROUGH AUGUST 1990

Summer sawtimber prices paid Illinois timber growers were generally higher than a year earlier for both stumpage and FOB. Of the timber buyers reporting volume of their 1990 operations, 48% indicated their volume was 500 thousand board feet or higher. This was up from the 1989 percentage of 43%.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

July 5, 1991

### PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1990 THROUGH FEBRUARY 1991

Winter sawtimber prices paid Illinois timber growers were generally lower than a year earlier for both stumpage and FOB. Of the timber buyers reporting volume of their 1990 operations, 45% indicated their volume was 500 thousand board feet or higher. This was up from the 1989 percentage of 41%.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is gratefully appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

### PRICES PAID ILLINOIS TIMBER PRODUCERS

#### MAY 1992 THROUGH AUGUST 1992

Summer sawtimber prices paid Illinois timber growers were mixed for both stumpage and FOB compared to last winter and the previous summer. Of the timber buyers reporting volume of their 1991 operations, 39% indicated their volume was 500 thousand board feet or higher. This is down from 45% in 1990.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

### PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1991 THROUGH FEBRUARY 1992

Winter sawtimber prices paid Illinois timber growers were generally higher than a year earlier for both stumpage and FOB. Of the timber buyers reporting volume of their 1991 operations, 37% indicated their volume was 500 thousand board feet or higher. This is down from the 1990 percentage of 45%.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit, Zone 2 the Claypan Unit and Zone 3 the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a guide for determining the market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price received. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

### PRICES PAID ILLINOIS TIMBER PRODUCERS MAY THROUGH AUGUST 1993

Summer sawtimber prices paid to Illinois timber growers were generally up for P.O.B. Mill and mixed for stumpage compared to both the previous winter and summer. Of the timber buyers reporting volume of their 1993 operations, 46% indicated their volume was 300 thousand board feet or more. This is up one percent from a year ago.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

## PRICES PAID ILLINOIS TIMBER PRODUCERS

### MAY 1994 THROUGH AUGUST 1994

Summer sawtimber prices paid to Illinois timber growers were generally higher for F.O.B. Mill and stumpage compared to the previous winter. Of the timber buyers reporting volume of their 1994 operations, 48% indicated their volume was 500 thousand board feet or more. This is up one percent from a year ago.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

### PRICES PAID ILLINOIS TIMBER PRODUCERS

#### NOVEMBER 1993 THROUGH FEBRUARY 1994

Winter sawtimber prices paid to Illinois timber growers were significantly higher for F.O.B. Mill and mixed for stumps compared to both the previous summer and winter. Of the timber buyers reporting volume of their 1993 operations, 44% indicated their volume was 500 thousand board feet or more. This is down one percent from a year ago.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.
