PRICES PAID ILLINOIS TIMBER PRODUCERS

MAY 1995 THROUGH AUGUST 1995

Summer sawtimber prices paid to Illinois timber growers showed no clear upward or downward trend for F.O.B. Mill and stumpage compared to both the previous summer and winter. Of the timber buyers reporting volume of their 1995 operations, 50% indicated their volume was 500 thousand board feet or more.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Conservation, 600 North Grand Avenue, West, Springfield, Illinois 62706.

PRICES PAID ILLINOIS TIMBER PRODUCERS

MAY 1996 THROUGH AUGUST 1996

Summer sawtimber prices paid to Illinois timber growers showed no clear upward or downward trend for F.O.B. Mill and stumpage compared to both the previous summer and winter. Of the timber buyers reporting volume of their 1996 operations, 42% indicated their volume was 500 thousand board feet or more.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarly, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Natural Resources, 600 North Grand Avenue, West, Springfield, Illinois 62706.

PRICES PAID ILLINOIS TIMBER PRODUCERS

MAY 1997 THROUGH AUGUST 1997

Summer sawtimber prices paid to Illinois timber growers generally showed slight upward trends for F.O.B. Mill and stumpage compared to both the previous summer and winter. Of the timber buyers reporting volume of their 1997 operations, 37% indicated their volume was 500 thousand board feet or more.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Natural Resources, 600 North Grand Avenue, West, Springfield, Illinois 62706.

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1996 THROUGH FEBRUARY 1997

Winter sawtimber prices paid to Illinois timber growers showed no clear upward or downward trend for F.O.B. Mill and stumpage compared to both the previous summer and winter. Of the timber buyers reporting volume of their 1996 operations, 38% indicated their volume was 500 thousand board feet or more.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Natural Resources, 600 North Grand Avenue, West, Springfield, Illinois 62706.

June 2, 1998

PRICES PAID ILLINOIS TIMBER PRODUCERS

NOVEMBER 1997 THROUGH FEBRUARY 1998

Winter sawtimber prices paid to Illinois timber growers generally showed slight upward trends for F.O.B. Mill and stumpage compared to both the previous summer and winter. Of the timber buyers reporting volume of their 1997 operations, 35% indicated their volume was 500 thousand board feet or more.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Natural Resources, 600 North Grand Avenue, West, Springfield, Illinois 62706.

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 1998 THROUGH FEBRUARY 1999

Winter sawtimber prices paid to Illinois timber growers generally showed mixed trends for F.O.B. Mill and stumpage compared to both the previous winter and summer. Of the timber buyers reporting volume of their 1998-99 operations, 37% indicated their volume was 500 thousand board feet or more.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Natural Resources, 600 North Grand Avenue, West, Springfield, Illinois 62706.

November 23, 1999

PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 1999 THROUGH AUGUST 1999

Summer sawtimber prices paid to Illinois timber growers generally showed mixed trends for F.O.B. Mill and stumpage compared to both the previous winter and summer. Of the timber buyers reporting volume of their 1999 operations, 48% indicated their volume was 500 thousand board feet or more.

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Forest Resources. Unless otherwise indicated, prices shown in this report are prices reported by licensed timber buyers. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forest Resources, Illinois Department of Natural Resources, 600 North Grand Avenue, West, Springfield, Illinois 62706.
