ILLINOIS TIMBER PRICES

HABITAT RESOURCES One Natural Resources Way Springfield, Illinois, 62702 Phone: (217) 785-8774 dnr.state.il.us

February 25, 2005

The staff of Habitat Resources and the Illinois Agricultural Statistics Service wishes to thank all who responded to the Illinois Timber Prices Survey. Your responses are important to resource managers, the wood product industry and made this publication possible.

PRICES PAID TO ILLINOIS TIMBER PRODUCERS MAY 2004 THROUGH AUGUST 2004

This report is prepared by the Illinois Agricultural Statistics Service in cooperation with the Illinois Division of Habitat Resources.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their 2004 operations, 28% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Habitat Resources, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Cooperage is the manufacture of barrels. Face vencer is logs cut into thin sheets or "veneer" used mostly by furniture builders.

Pulpwood is used in making paper, fiberboard, and similar products. M bd. ft. means thousand board feet. Sawtimber refers to logs that are cut into lumber or timbers. F.O.B. refers to the price paid for timber delivered to the mill. Stumpage is the price for a standing tree.

Cooperage is the manufacture of barrels. Face veneer is logs cut into thin sheets or "veneer" used mostly by furniture builders.

Pulpwood is used in making paper, fiberboard, and similar products. M bd. ft. means thousand board feet. Sawtimber refers to logs that are cut into lumber or timbers.

F.O.B. refers to the price paid for timber delivered to the mill. Stumpage is the price for a standing tree.

MAY 2006 THROUGH AUGUST 2006

PRICES PAID TO ILLINOIS TIMBER PRODUCERS MAY 2006 THROUGH AUGUST 2006

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their 2005 operations, 59% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at: http://web.extension.uiuc.edu/forestry/il_timber_prices/index.html

RESOURCES

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 2006 THROUGH FEBRUARY 2007

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their 2006 operations, 31% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at: http://web.extension.uiuc.edu/forestry/il_timber_prices/index.html

NOVEMBER 2007 THROUGH FEBRUARY 2008

June 2, 2008

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 2007 THROUGH FEBRUARY 2008

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. The cooperation of those timber buyers who participated in the survey is greatly appreciated.

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their 2007 operations, 51% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at: http://web.extension.uiuc.edu/forestry/il_timber_prices/index.html

PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 2008 THROUGH FEBRUARY 2009

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. *The cooperation of those timber buyers who participated in the survey is greatly appreciated.*

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their 2009 operations, 42% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at: http://web.extension.uiuc.edu/forestry/il_timber_prices/index.html
