## MAY 2010 THROUGH AUGUST 2010

December 1, 2010

### PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 2010 THROUGH AUGUST 2010

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. *The cooperation of those timber buyers who participated in the survey is greatly appreciated.*

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their operations, 45% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at:  
[http://web.extension.uiuc.edu/forestry/il\\_timber\\_prices/index.html](http://web.extension.uiuc.edu/forestry/il_timber_prices/index.html)

## NOVEMBER 2009 THROUGH FEBRUARY 2010

June 1, 2010

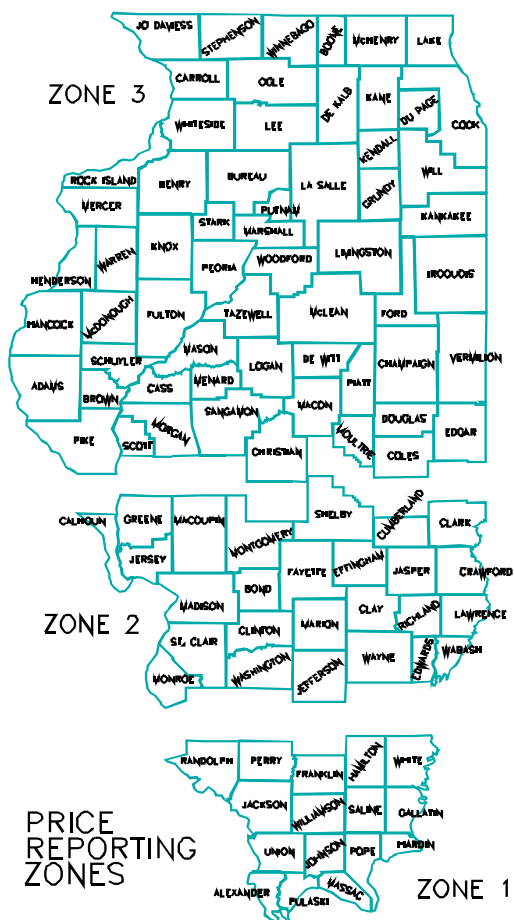

### PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 2009 THROUGH FEBRUARY 2010

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. *The cooperation of those timber buyers who participated in the survey is greatly appreciated.*

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their 2009-2010 operations, 48% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

## NOVEMBER 2010 THROUGH FEBRUARY 2011

June 1, 2011

### PRICES PAID BY ILLINOIS TIMBER PRODUCERS NOVEMBER 2010 THROUGH FEBRUARY 2011

This report is prepared by the Illinois Field Office of the National Agricultural Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. *The cooperation of those timber buyers and forestry consultants who participated in the survey is greatly appreciated.*

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices, and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their operations, 35% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing, or management assistance, contact your local State Forester, or the Division of Forestry at Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at:  
[http://web.extension.uiuc.edu/forestry/il\\_timber\\_prices/index.html](http://web.extension.uiuc.edu/forestry/il_timber_prices/index.html)

## MAY 2012 THROUGH AUGUST 2012

December 3, 2012

### PRICES PAID ILLINOIS TIMBER PRODUCERS MAY 2012 THROUGH AUGUST 2012

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. *The cooperation of those timber buyers and forestry consultants who participated in the survey is greatly appreciated.*

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices, and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their operations, 60% indicated their volume was 500 thousand board feet or more. This is an increase of 7% over the last reporting period.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing, or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

## NOVEMBER 2011 THROUGH FEBRUARY 2012

June 1, 2012

### PRICES PAID ILLINOIS TIMBER PRODUCERS NOVEMBER 2011 THROUGH FEBRUARY 2012

This report is prepared by the Illinois Field Office of the National Agriculture Statistics Service in cooperation with the Illinois Department of Natural Resources - Division of Forestry. *The cooperation of those timber buyers and forestry consultants who participated in the survey is greatly appreciated.*

Illinois is divided into three price-reporting zones, based on timber resources, similarity, utilization standards and practices, and soil types. Zone 1 is the Southern Unit; Zone 2, the Claypan Unit; and Zone 3, the Prairie Unit. Ranges of prices for each zone are shown on the back of this report. Of the timber buyers reporting volume of their operations, 53% indicated their volume was 500 thousand board feet or more.

This report can be used only as a general guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Certain local considerations such as accessibility, site and terrain, distance to market, size of sale, and tree size and quality also affect the price paid. For technical, marketing, or management assistance, contact your local State Forester, or the Division of Forestry, Illinois Department of Natural Resources, One Natural Resources Way, Springfield, Illinois 62702.

Prices from 1978 to current can be seen at:  
[http://web.extension.uiuc.edu/forestry/il\\_timber\\_prices/index.html](http://web.extension.uiuc.edu/forestry/il_timber_prices/index.html)

PRICES PAID ILLINOIS TIMBER GROWERS  
MAY 2014 THROUGH AUGUST 2014

This report is prepared by the Illinois Department of Natural Resources - Division of Forest Resources in cooperation with timber buyers, forestry consultants and division foresters who participate in the semi-annual survey. Illinois timber prices from price surveys are now calculated and published on a statewide basis (combining the historic southern, clay-pan and prairie zones). Ranges of prices paid and averages price paid across the state are shown. This report can be used only as a guide for determining market value of timber. General market and economic conditions are the major price-determining factors. Local considerations such as markets, site conditions, timber accessibility, topography and terrain, distance to markets, tree size and quality, size of sale and other factors also affect prices paid. Please contact your local state forester's field office (District Forester) or the Division of Forest Resources headquarters at One Natural Resources Way, Springfield, Illinois 62704. Phone: (217) 782-3376

Illinois timber prices from 1978 to current can be found at:
